**Subject:** Peace River Nuclear Power Project – Update on Technology Consideration

Dear Joe,

**Re: Peace River Nuclear Power Project – Update on Technology Consideration**

I am writing to update you on our August correspondence regarding the suspension of the regulatory timeline for the Peace River Nuclear Power Project. This suspension was in response to requests by Indigenous Nations and Communities for additional time to more fully and meaningfully participate in the regulatory process and increase community awareness and education about the nuclear energy sector.

In our letter, we also noted our ongoing review and refinement of technology for the Project. We want to share that we have been making progress in our efforts to consider the best reactor technology, taking into account our target timelines. Safety remains our top priority and we are committed to selecting a reactor technology that meets Canada’s rigorous requirements with demonstrated reliability and safety in real-world applications.

We will update you as our efforts progress. As always, we are happy to answer any questions and address any concerns you may have.

Yours sincerely,

**Jill Baker**  
Regulatory Lead
